

PPG Dekoral Akrylit SX Aero

Product information

Akrylit SX Aero is the latest generation of paints formulated with high-quality polymer binding and ultralight glass fillers. Thanks to advanced technology, the product has unique properties, such as deep matte and anti-reflective finishing, thermal insulation based on its reflectance, that is the ability to reflect radiation and unprecedented resistance to UV radiation. Additionally, the paint coating is resistant to fungi and mould, which prevents the development of micro-organisms on the protected surface.
